- monitor all the above, inside a secure - Cloud, multilanguage , user friendly, enviroment from wherever you are, translated in your native language (\*)

(\*) Already available in English, Greek, Spanish, Ukrainian

## What is TimeToWork ?

TimeToWork is an innovative, multilanguage, **Cloud**, Time Attendance Application that, in cooperation with SOYAL Access Systems, gives the opportunity to get complete information about the exact amount of working hours of your employees.

It also provides you with non-working day management information (eg holidays, vacations) as well as a complete staff file.

And all these from a secure Cloud Web Enviroment, in order to be able to monitor your Employees Attendance live, **from wherever you are**.
